

Actimove® SPORT Adjustable Elbow Support
INSTRUCTIONS FOR USE

Elbow support for elbow injuries and their prevention. Use for acute pain, sprains, and strains.

Medical device. For information on the risks, read the instructions for use below or ask your healthcare professional!

Actimove® products are available from pharmacies or medical supply stores. To purchase the product medical prescription is not required.

Instructions for use:

Open the box and remove the product.

Open the lower and upper hook-and-loop fasteners then place your arm in a way that the black fabric rests in the elbow crease, then pull it up onto your elbow in so that the Actimove® logo is on the upper, upper-arm-side of the device.

Afterwards secure the product first using the lower fastener then followed by the upper fastener. Adjust the size to the most suitable diameter of your arm using the hook-and-loop fasteners.

The recommended period for wear varies but is usually for the duration of exercise or physical activity, i.e. from 30 to 180 minutes. In acute conditions, the elbow support can be worn all day.

Wearing the product at night and during rest periods is not recommended as excessive use may cause muscle weakness, the stabilising and retaining functions of the muscle may be impaired.

When worn for therapeutic purposes, please discuss the necessary usage period of the device with a healthcare professional.

The product packaging shall be disposed in the appropriate separate waste bin.

Washable at 40 °C.

Contraindications:

- Diseases associated with peripheral venous occlusion (phlebo-thrombosis, thrombo-phlebitis)
- Peripheral arterial circulatory disorders
- Venous inflammation caused by microorganisms (septic phlebitis)
- Skin diseases (dermatoses)
- Open wounds, any surface lesions with disruption of skin continuity, ulcers
- Advanced peripheral neuropathy due to nerve damage or degeneration in the extremities
- Intolerance to the material of the product
