- **Actimove®Sport Knee Support with open patella design_M**
- **Actimove®Sport Knee Support with open patella design L**
- **Actimove®Sport Knee Support with open patella design XL**

Knee support for alleviating kneecap pain in case of minor sports injuries. Use for preventing knee injuries, minor ligament strains, sprains, bruises, minor meniscus injuries, and in cases of swelling.

Medical device. For information on the risks, read the instructions for use below or ask your healthcare professional!

Actimove® products are available from pharmacies or medical supply stores. To purchase the product medical prescription is not required.

Instructions for use:

Open the box and remove the product.

Pull it onto your knee in a way that the Actimove® logo positioned on the upper, thigh-facing part of the device and the kneecap aligns with the open section.

The recommended period for wear varies but usually for the duration of exercise or physical activity, i.e. from 30 to 180 minutes. In acute conditions, the knee support can be worn all day.

Wearing the product at night and during rest periods is not recommended as excessive use may cause muscle weakness, the stabilising and retaining functions of the muscle may be impaired.

When worn for therapeutic purposes, please discuss the necessary usage period of the device with a healthcare professional.

The product packaging shall be disposed in the appropriate separate waste bin.

Washable at 40 °C.

Contraindications:

- Diseases associated with peripheral venous occlusion (phlebo-thrombosis, thrombo-phlebitis)
- Peripheral arterial circulatory disorders
- Venous inflammation caused by microorganisms (septic phlebitis)
- Skin diseases (dermatoses)
- Open wounds, any surface lesions with disruption of skin continuity, ulcers

- Advanced peripheral neuropathy due to nerve damage or degeneration in the extremities
- Intolerance to the material of the product
